Commercial or professional PND

Navigator

GPS Receiver
+ SIM

NOVATRACK - C4I SYSTEM

Navigator
+ SIM

Flexible, inter-changeable solution
No fixed hardware in vehicle
Bidirectional communication & navigation
Extendable to Mobile Computing

Real-Time information and communication

Keep the workforce informed of the latest updates by exchanging text messages directly on the PND. Share information with the customer such as estimated time of arrival, order changes, etc. Get real-time feedback on your driving efficiency.

Order management for dispatchers

Improve order management by better allocating the work, by reducing driving time and lower workforce downtime. Facilitate administrative organisation by direct communication with billing tools.

Order History & Reports

Get the complete end to end overview of the missions. Schedule automated reports.

Flexibility

The different devices can be turned on and off individually as well as transferred from one vehicle to the other. The combined solution can be installed directly in a vehicle or according to the needs, offering optimal scalability.

Modularity

Novatrack integrates any type of GPS receiver as well as PND/Navigators with known communication protocol.

Customizable

According to the devices that are communicating with the application and the requirements of the client, the presentation of the information, the reports, and the different process flows can be customized and optimized.
